TECHNICAL SKILLS

Languages: JavaScript, Appscript,TypeScript
Frameworks/Libraries: ExpressJS, React,Nodejs.
IT Constructs: DSA, OOPS, DBMS, DevOps.
Database: MySQL, PostgreSQL, MongoDB.
Developer Tools: Git, Bitbucket, Webstrom VSCode.

EXPERIENCE

Vlocity AI Pvt.Ltd (Glory Autotech LLP)   Jun 2023 –Present
Software Developer
- Continuous Integration/Deployment Pipelines, pull requests, code reviews, unit/integration, containerizing.
- Implemented third-party hourly report integration, automating retrieval from multiple ad platforms. Key role in boosting data accuracy and timeliness.
- Created and currently managing the open-source library 'clean-code-architecture-starter'.

Glory Autotech LLP.   Nov 2022 –May 2023
Software Developer
- Actively participate and contribute to the automation and optimizing business logic.
- Implemented AWS S3 Bucket and Cloudinary for seamless and efficient file uploads.

PROJECTS

SLIFAX—*Node.js, MongoDB*   Feb 2024 – Present
- Slifax is an admin platform for e-commerce management, focusing on products, brands, categories, and user permissions.As a backend developer, we used **Node.js**, **TypeScript**, and **MongoDB** within a **microservices architecture** and **clean codeprinciples**. Handle **CRUD** operations and role-based access control (**RBAC**). Develop secure, scalable **RESTful** APIs and optimize performance.

EQUIDEI — *Node.js, Socket, MongoDB, PostgreSQL*   Dec 2023 – Feb 2023
- Revemped the project from Javascript and MongoDB to typescript and Postgres for more **robust** and **statically- typed** codebase.
- Building a CI/CD pipeline for smoother **containerized deployment**.

BOTCY(ECom-chatBot) — *Node.js, MongoDB, Deployment*   Aug 2023 – Nov 2023
- Improved the **loading time and efficiency** by saving the conversations in **Redis** in separate sets as per bot type instead of one set only. Designed **database architecture** to scale the product.

ADSCALE (KYC, Dashboards)—*Node.js, DynamoDB, MongoDB.*   Dec 2022 –Dec 2023
- AdScale is an ads management project that **integrates popular ad platforms** such as TikTok, Facebook, Google, Yahoo, Taboola, etc. Alongside this integration, it provides a **Rule-Based Optimization** with which we can scale and boost our ROI, **Simplified Account Management**.
- Further improved the backup algorithm architecture and storage using **Indexing** and **aggregation** in the database, resulting in the **35% increase in the overall system efficiency.**
- Overcame **TikTok's creation of only 10 ads simultaneously** by implementing a system in my role, enabling the **creation of unlimited ads**. This streamlined approach enhances flexibility and scalability. TECHNICAL SKILLS

EDUCATION

Chandigarh University   Mohali, PB
Master of Computer Application, Pursuing   *July 2023 – June 2025*

Savitribai Phule Pune University   Sayli, DD
Bachelor of Computer Application, Percentage: 90%   *July 2019 – August 2022*
